I am writing to apply for the Implementierungsmanager / Projektmanager position in der Personaldienstleistung at MatchingCompany´fi. Your focus on connecting expertise with empathy and recognizing potential beyond the CV resonates with how I approach both technology and collaboration.

Through my professional experience as a software engineer and project contributor, I have developed a structured, solution-oriented approach to managing complex implementations. I have coordinated cross-functional teams, defined milestones, tracked budgets, and ensured successful project delivery from conception to go-live. This experience maps directly to the responsibilities of overseeing large-scale implementations and managing stakeholder expectations.

One area that particularly interests me is the digitalization of processes and the coordination of internal departments such as Recruiting, Legal, and IT. In my previous work, I regularly collaborated with diverse teams to align technical deliverables with business requirements, ensuring smooth transitions and high adoption rates among end users. I am comfortable navigating change management and maintaining clear communication with decision-makers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and implementation experience can contribute to your client’s success.

Sincerely,

Md Shahanur Islam Shagor
