I am writing to express my interest in the Senior Freelance eazyBI & JIRA Reporting Specialist (Contract) role at Deep Automation. The opportunity to work on a defined-scope project building advanced reporting solutions for a complex software platform aligns well with my analytical approach and technical background.

Through my professional experience as a web developer, I have worked extensively with data-driven systems, building dashboards, integrating APIs, and optimizing database queries for performance and accuracy. I am comfortable analyzing complex program structures, validating data integrity, and ensuring that reporting outputs are reliable and actionable.

One area that particularly interests me is the challenge of transforming raw data into intuitive, meaningful insights. In previous work, I have designed systems that required careful data modeling, real-time updates, and clear visualization of key metrics. These experiences have strengthened my ability to work with multidimensional data and translate business needs into structured reporting solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available for this one-time project on a freelance basis and can start immediately. My CV is attached for your review. I look forward to the possibility of contributing to Deep Automation’s reporting capabilities.

Sincerely,

Md Shahanur Islam Shagor
