I am writing to apply for the Creative Director role at PadSplit. Your mission to expand affordable housing through a trusted brand experience is both timely and important, and I am drawn to the opportunity to help shape creative strategy that directly supports that mission.

My background is in full-stack development and AI engineering, which has given me a practical understanding of how creative decisions translate into working products. I have experience building responsive, user-focused interfaces using modern tools like Figma, Tailwind CSS, and Next.js, and I have integrated AI-powered features into production applications using OpenAI and Replicate APIs. This technical fluency allows me to bridge creative vision with engineering execution effectively.

PadSplit is looking for someone who can build creative operations, drive campaigns across channels, and use performance data to improve outcomes. In my professional experience, I have delivered end-to-end web applications that required close collaboration with stakeholders, consistent brand presentation, and measurable results. I am comfortable working across design, product, and engineering teams to ensure creative is embedded early in major initiatives.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to PadSplit’s creative direction and growth.

Sincerely,

Md Shahanur Islam Shagor
