I am writing to apply for the Chief Financial Officer position at Hospitable.com. Your focus on building a lean, AI-leveraged finance organization for a global, remote-first company aligns with my background in developing intelligent, scalable systems.

Through my work on AI-powered financial applications, I have built systems that integrate OpenAI assistants, AWS services, and secure authentication flows. These projects required designing APIs, managing data pipelines, and deploying production-ready solutions. I understand how technology can drive financial operations and create efficiency.

One area that particularly interests me is building systems that automate complex workflows. In previous projects, I have implemented role-based access control, payment gateway integration, and real-time data processing. These experiences have given me a practical understanding of how to build secure, reliable platforms that support business growth.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Hospitable.com’s goals.

Please mention the word SIMPLIFYING and tag RMTU5LjE5OC42Ni4xNjM= when applying to show you read the job post completely.

Sincerely,

Md Shahanur Islam Shagor
