I am writing to apply for the Total Rewards Manager position at PGIM Ireland. The role's focus on compensation analytics, headcount forecasting, and cross-functional collaboration within a global team aligns with my experience in building data-driven systems and working across international teams.

Through my professional experience, I have developed strong analytical and technical skills that directly support the responsibilities outlined in this role. I have worked extensively with MySQL and PostgreSQL for data modeling and reporting, and I have used AWS for scalable data processing and analytics. My familiarity with data visualization tools and my active development of AI prompting skills position me well to support PGIM's continued use of Microsoft Co-Pilot and other analytics platforms.

One area that particularly interests me is the opportunity to partner with People Business Leaders, People Operations, and Finance to develop streamlined approaches for headcount and compensation expense analytics. In my previous work, I regularly collaborated with cross-functional teams to design and implement systems that required accurate data tracking, forecasting, and reporting. I am comfortable managing multiple priorities and delivering insights that drive business decisions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the PGIM Total Rewards team. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
