I am writing to apply for the Bid Manager position at Razorblue Group. Your focus on delivering five-star IT solutions and investing in continuous learning aligns with how I approach my own work.

Although my background is in software engineering rather than pure bid management, I bring strong technical literacy combined with the ability to write clearly and persuasively. In my professional experience as a Web Developer, I regularly translated complex technical requirements into accessible documentation, proposals, and client-facing communications. I am comfortable analysing tender documents, understanding customer requirements, and ensuring consistency in messaging across submissions.

One area that particularly interests me is the end-to-end bid process. Through my work delivering full-stack applications, I have developed strong organisational skills, the ability to manage multiple deadlines, and experience collaborating with cross-functional teams including business development and operations. I am used to facilitating review meetings, tracking deliverables, and maintaining structured documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to Razorblue Group’s bid management team.

Sincerely,

Md Shahanur Islam Shagor
