I am writing to apply for the Projektleiter (m/w/d) Simulationssysteme position at MY Humancapital GmbH in Munich. The role's focus on managing complex technical development projects and coordinating interdisciplinary teams aligns with my experience in software engineering and project delivery.

Through my professional experience, I have led full-cycle development projects, taking responsibility for quality, timelines, budget, and performance. I have coordinated teams across development, external partners, and stakeholders, ensuring clear communication and alignment throughout each project phase. My work has involved project planning, risk management, progress tracking, and the preparation of technical reports.

One area that particularly interests me is the opportunity to drive process improvements and support project teams through strategic guidance. In previous roles, I have contributed to refining technical workflows and have acted as a central interface between clients and engineering teams, managing requirements and change requests effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my project management skills and technical background make me a strong candidate for this position. I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
