I am writing to apply for the Vehicle Repair Assessor position at Hire with Reef, supporting Assure Scratch & Dent's Australian operations. While my background is in software engineering rather than automotive repair, I bring strong computer skills, remote work discipline, and a detail-oriented approach that directly supports the assessment workflow described in this role.

One area where I can contribute immediately is in the technical and administrative side of the role. I have extensive experience working with CRMs, managing detailed records, and maintaining accuracy under time pressure. In my previous remote work as a Web Developer, I regularly handled complex data entry, tracked project details across multiple systems, and communicated clearly with international teams. These skills align well with the responsibility of keeping detailed assessment notes within the CRM and maintaining fast turnaround times while ensuring accuracy.

I also understand the importance of clear written communication in a remote setting. I have worked with Australian clients before and am comfortable with the communication standards expected in this role. My ability to work independently, manage my own schedule, and stay organized without direct supervision has been proven over several years of remote work.

In addition to my technical and organizational experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my computer skills, remote work experience, and attention to detail can support the Assure Scratch & Dent team.
