I am writing to express my interest in joining Flok Health. Your focus on AI-native healthcare and the challenge of delivering MSK care at population scale is exactly the kind of problem I want to work on. I am a Full-Stack & AI Engineer with experience building intelligent systems that bridge software engineering and real-world impact.

Through my professional work and project development, I have built full-stack applications using Laravel, Next.js, React, TypeScript, and Node.js, and integrated AI capabilities including OpenAI-based assistants and computer vision models such as YOLOv8. I have experience designing RESTful APIs, implementing role-based authentication, and deploying production systems on Linux servers with Docker and CI/CD pipelines.

One project that reflects my approach is an AI-powered financial application where I developed the backend using Express, TypeScript, OpenAI, and AWS, handling authentication, AI assistant training, voice-to-text processing, and automated PDF generation. This required careful system design, third-party API integration, and real-time data handling.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
