I am writing to apply for the Remote Mitigation Restoration Estimator position at SERVPRO of Vacaville / Dixon. While my professional background is in software engineering and full-stack development, I have developed strong skills in data analysis, documentation, and process optimization that align well with the responsibilities of this role.

In my previous work as a Web Developer, I regularly reviewed technical documentation, analyzed data from multiple sources, and ensured accuracy and compliance with project requirements. I am accustomed to working under strict deadlines and maintaining high attention to detail, which I understand is critical in restoration estimating.

I am a self-motivated professional comfortable working independently in a remote environment. I have a reliable high-speed internet connection and a dedicated home office setup. I am available to work EST hours and have the flexibility to work weekends when needed to maintain TPA compliance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
