I am writing to apply for the Vergabemanager (m/w/d) position in public procurement at MY Humancapital GmbH. Although my professional background is in software engineering, I bring strong organizational capabilities, structured process management, and experience coordinating complex workflows that translate well into procurement management.

In my previous roles as a Web Developer, I managed end-to-end project delivery, coordinated with internal teams and external stakeholders, and ensured all deliverables met precise requirements and deadlines. I am accustomed to handling documentation, tracking multiple parallel tasks, and maintaining clear communication across different parties. These skills align with managing bidding procedures, submission reviews, and stakeholder coordination.

I am confident in my ability to quickly learn public procurement regulations and digital procurement platforms. My technical background gives me an advantage in working with digital tools and data management systems, which supports efficient handling of formal evaluation and documentation processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
