I am writing to apply for the Consultant Datenschutz / Privacy Consultant position at tacticx Consulting GmbH. Your focus on making data protection a driver for trustworthy digitalization, especially at the intersection of AI, information security, and compliance, is exactly the kind of challenge I want to contribute to.

My background is in software engineering with a strong emphasis on cybersecurity and secure systems. Through research and development work, I have designed and implemented privacy-preserving architectures, including a decentralized blockchain framework for autonomous vehicle networks that uses Zero-Knowledge Proofs and post-quantum cryptography to ensure data integrity and anonymity. This work required deep thinking about risk, trust, and resilience in complex environments.

One area that particularly interests me is conducting risk analyses and data protection impact assessments for systems that incorporate AI and automation. My experience building secure communication protocols and tamper-proof data layers gives me a practical understanding of how privacy and security must be embedded into system design from the ground up, not added as an afterthought.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my technical perspective on privacy, security, and AI to your team. I have attached my CV for your review and look forward to the possibility of contributing to tacticx Consulting GmbH’s mission.

Sincerely,

Md Shahanur Islam Shagor
