I am writing to apply for the (Senior) Online Marketing Manager - Paid Social position at mammaly. Your mission to improve the health and happiness of dogs through premium supplements, combined with your ambition to build the best media-buying team in Germany, stands out to me.

My background is in full-stack software engineering, where I have built and optimized acquisition-focused systems for e-commerce platforms. I have hands-on experience with Figma for creative collaboration and understand how to build scalable funnels that convert users from first click to checkout. This technical foundation gives me a strong ability to analyze funnels, identify optimization levers, and work closely with creative and CRO teams.

In previous work, I developed a Multivendor E-commerce Management Ecosystem that integrated multiple role-based applications with a centralized backend. This involved designing user flows, implementing authentication and payment systems, and optimizing database performance for high-traffic scenarios. I am comfortable working with data-driven metrics and iterating on performance hypotheses.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background could contribute to mammaly’s growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
