I am writing to apply for the Fachinformatiker / IT-Systemelektroniker position with a focus on Alamos, alarm systems, and BOS-IT at SW-Projekte GmbH. Your work in digitalizing and securing emergency responder infrastructure is directly relevant to my background in building reliable, high-availability systems.

Through my professional experience as a Web Developer, I have worked extensively with Linux servers and Docker for deploying and maintaining production applications. I have set up Nginx and Apache configurations, managed containerized environments with Docker Compose, and implemented CI/CD pipelines to ensure stable and repeatable deployments. This aligns well with your requirement for modern cloud and server environments.

One area that particularly interests me is the focus on critical infrastructure for emergency services. I have experience building secure systems with role-based access control, authentication, and real-time features using WebSockets. I am comfortable troubleshooting network components, firewalls, and client hardware, and I have worked on both remote and on-site support scenarios.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in Linux, Docker, and reliable system operations can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
