I am writing to apply for the Analyst:in position at CFC Corporate Finance Contor GmbH. Your firm's focus on M&A and Debt Advisory, combined with the opportunity to work directly on transactions from mandate to closing, is exactly the kind of environment where I want to build my career.

Through my academic background in Software Engineering and hands-on project work, I have developed strong analytical and research capabilities. I am comfortable working with large datasets, conducting independent research, and translating complex information into clear, structured formats. My experience includes building financial models and preparing detailed reports, which aligns well with the responsibilities of financial modelling and company valuation.

In previous work, I have prepared presentations and investment memoranda for stakeholders, ensuring clarity and accuracy in communication. I have also coordinated with cross-functional teams and managed tasks from initiation to completion, skills that translate directly to supporting due diligence processes and deal execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical skills and dedication can contribute to CFC's continued success.

Sincerely,

Md Shahanur Islam Shagor
