I am writing to apply for the Mitarbeiter Lohnsupport position at SelectLine Group. The role combines technical support, customer interaction, and collaboration with product and development teams, which aligns well with my background in software engineering and user-facing problem-solving.

Through my professional experience as a Web Developer, I have developed strong skills in diagnosing technical issues, troubleshooting software errors, and guiding users through installation and configuration processes. I am comfortable working with ticketing systems, documenting cases clearly, and following issues through to resolution. My technical foundation in web technologies, databases, and server environments allows me to understand and address both frontend and backend problems effectively.

One area that particularly interests me is the opportunity to work closely with product management and development teams to improve software quality. In previous roles, I collaborated with engineers to identify recurring bugs, document reproduction steps, and contribute to knowledge bases. I enjoy the process of turning support insights into tangible product improvements.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my support and technical skills can contribute to the SelectLine team.

Sincerely,

Md Shahanur Islam Shagor
