I am writing to apply for the Performance Marketing & Social Ads position at Bootshaus Cologne GmbH. Your work in electronic music and nightlife management is interesting, and I am drawn to the opportunity to contribute to new projects in this space.

My background is in software engineering, where I have developed a structured, data-driven approach to problem-solving. Through my professional experience building web applications, I have learned to analyze performance metrics, optimize systems based on data, and work independently to deliver reliable results. These skills translate directly to planning, analyzing, and optimizing performance marketing campaigns.

I am a quick learner with a strong ability to observe trends and adapt strategies accordingly. I am confident I can quickly master the Meta Business Manager and TikTok Ads Manager platforms to plan and execute effective campaigns. My experience with data analysis and creative thinking will help me develop new advertising approaches and creatives based on data and trends.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
