I am writing to apply for the Werkstudent App-Entwicklung position at Modern Drive Technology GmbH. Your work as an IoT cloud integrator for OEMs and machine producers is interesting, and I appreciate the focus on building branded digital service worlds without requiring clients to build their own cloud infrastructure.

I am currently pursuing a Bachelor's in Software Engineering at Voronezh State University of Forestry and Technology, Russia. My academic background, combined with hands-on project work, has given me a solid foundation in JavaScript and TypeScript, along with practical experience building applications with React and Next.js.

Through hands-on project development, I have built full-stack applications using React, TypeScript, and Tailwind CSS, implementing responsive UI components and integrating REST APIs. One project that aligns well with your needs is the Travel Agency App, where I developed the frontend using Next.js, TypeScript, Material UI, and Tailwind CSS, and connected it to a NestJS backend with MySQL. I also worked with Google Maps, multi-language support, and deployed the application on AWS.

In my professional experience as a Web Developer, I have delivered scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, implemented authentication and role-based access control, and deployed applications on Linux servers with Nginx and Docker. I am comfortable with Git for version control and have experience with code reviews and technical documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
