I am writing to apply for the Growth & Success Manager role at Medida AI. Your mission to build the spatial intelligence layer for the home and transform how the physical world is measured and designed is genuinely compelling. I am drawn to the high-ownership, execution-oriented nature of this role and the opportunity to work directly with leadership across sales and operations.

In my previous work at Explo-IT and DataSoft LTD, I have spent over four years in customer-facing roles within high-growth tech environments. I have launched new customers, supported strategic accounts, and created processes to streamline onboarding and product adoption. I am comfortable operating in ambiguity and rapid change, and I have a strong bias toward action and resourcefulness.

One area that particularly interests me is the chance to work directly with the CEO on special GTM projects. I have experience collaborating with leadership to develop content, manage accounts, and drive operational efficiency. I am highly organized and detail-oriented, with strong follow-through on every initiative I take on.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to Medida AI’s growth and success.

Sincerely,

Md Shahanur Islam Shagor
