I am writing to apply for the Social Media and Influencer Manager position at Pete & Gerry's Organics, LLC. Your mission to combine animal welfare, planet-friendly farming, and high-quality nutrition resonates with me, and I appreciate the emphasis on building a community around shared values.

My background is in software engineering, where I have spent over four years building full-stack web applications and working with data-driven systems. I have developed platforms using Laravel, Next.js, React, and Node.js, and I have integrated analytics, authentication, and real-time features into production applications. This technical foundation gives me a strong understanding of how digital platforms work, how data flows through them, and how to measure performance effectively.

One area that particularly interests me is the use of data to inform strategy. In my previous work, I have built dashboards and monitoring systems that track key metrics in real time, using tools like Socket.IO and Grafana. I am comfortable working with analytics, interpreting data, and turning insights into actionable improvements. I also have experience with AI content workflows, which aligns with your bonus qualification for AI familiarity.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
