I am writing to apply for the Digital Strategist / Web Manager role at Seekrette. Your focus on turning complex business challenges into smart integrated digital solutions aligns directly with the kind of work I have been doing for the past several years.

With over 4 years of professional web development experience, I have managed, developed, and expanded client websites across multiple domains. At Explo-IT, I was responsible for building scalable web applications using Laravel and Next.js, integrating RESTful APIs, and implementing SEO-friendly interfaces that improved search visibility and user engagement. I also worked closely with stakeholders to understand business goals and translate them into functional digital strategies.

One area that particularly interests me is using data to drive decisions. In previous projects, I have integrated Google Analytics and other webmaster tools to monitor traffic patterns, identify opportunities, and optimize content strategies. I am comfortable working with competitor research and using insights to refine search engine approaches for better lead generation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I would welcome the opportunity to discuss how my background in web development and digital strategy can help Seekrette deliver results for its clients.

Sincerely,

Md Shahanur Islam Shagor
