I am writing to apply for the Bauingenieur (m/w/d) - Projektmanagement position at MY Humancapital GmbH. While my formal training is in software engineering, I bring strong project management, technical documentation, and cross-functional coordination skills from delivering complex, multi-phase projects.

In my professional experience as a Web Developer, I planned and steered infrastructure and development projects from concept through deployment. I was responsible for project execution, on-site coordination, and ensuring quality, cost, and schedule targets were met. I also conducted system analysis, evaluated existing architectures, and produced detailed reports and documentation throughout all project phases.

One area that particularly interests me is the structured approach to managing new construction and renovation projects. My background in building scalable systems from the ground up has given me a disciplined workflow for handling technical challenges, assessing existing conditions, and guiding projects through every stage with clear documentation and stakeholder communication.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my project management and technical skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
