I am writing to express my interest in the Captain position at UICGS / Bowhead Family of Companies, supporting the Atlantic Undersea Test & Evaluation Center (AUTEC) at Andros Island.

While my professional background is in software engineering and autonomous systems, I bring strong technical problem-solving abilities, clear communication skills, and experience coordinating complex operations that are directly applicable to this role.

In my previous work as a Web Developer, I was responsible for managing multiple concurrent tasks, communicating with stakeholders, and ensuring system reliability through careful monitoring and documentation. These experiences have developed my ability to work under pressure, make sound decisions, and maintain clear communication with team members.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I understand this position requires a USCG Master 100 Ton Oceans license and specific maritime certifications, which I do not currently hold. However, I am a quick learner with strong problem-solving skills and am committed to obtaining any necessary qualifications. I have attached my CV for your review and welcome the opportunity to discuss how my background could contribute to the AUTEC mission.

Sincerely,

Md Shahanur Islam Shagor
