I am writing to apply for the E-Commerce Manager role at LunyOne GmbH. Your 360-degree merchandising service for creators and the opportunity to manage and develop Shopify stores across multiple channels is exactly the kind of hands-on, technically grounded e-commerce work I enjoy.

My background is in full-stack web development, with strong frontend skills in HTML, CSS, JavaScript, and modern frameworks like Next.js and React. I am comfortable working with custom code snippets, theme settings, and frontend structures, which aligns well with the Shopify theme customization and Liquid snippet work described in the role.

In my professional experience as a Web Developer, I have built and maintained scalable web applications, integrated RESTful APIs, implemented authentication and payment systems, and worked closely with teams to deliver production-ready features. I am used to collaborating with developers on complex API topics while also handling frontend and store-level tasks independently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my technical and e-commerce experience can contribute to LunyMerch’s continued growth.

Sincerely,

Md Shahanur Islam Shagor
