I am writing to apply for the Prˆ…fungsassistent (m/w/d) position at Schwertfels Consulting GmbH. Your focus on auditing processes, financial analysis, and supporting businesses in understanding their economic structures aligns with my interest in working with complex systems and data.

Through my software engineering work, I have developed strong analytical skills and attention to detail. Building full-stack applications required me to work precisely with data, identify inconsistencies, and ensure accuracy across multiple systems. These habits of careful analysis and structured thinking translate well into auditing and financial review work.

One area that particularly interests me is the opportunity to examine how companies operate financially. In my development work, I frequently analyzed business requirements and data flows to build systems that improved operational transparency. I approach complex information methodically and enjoy understanding how different parts of a system connect.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and independent work style could contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
