I am writing to apply for the Technische Assistenz position at LECARE. Your company's 40-year track record of developing digital solutions for legal departments, from mid-size firms to international corporations like Lufthansa, is impressive. The idea of supporting a cross-functional team in a newly created role that combines organization, documentation, and process coordination appeals to me.

Through my professional experience as a software engineer, I have developed strong organizational habits and attention to detail. I am comfortable working with tools like GitHub and have experience maintaining structured project documentation. I enjoy keeping processes clear and ensuring that information flows smoothly between team members.

One area that particularly interests me is the cross-team coordination aspect of this role. In my previous work, I regularly collaborated with developers, product managers, and stakeholders to align priorities and track progress. I am experienced in documenting decisions, following up on action items, and maintaining clarity across different functional areas.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my organizational skills and technical understanding to LECARE, supporting your teams so they can focus on their core expertise. I have attached my CV for your review and look forward to hearing from you.

Sincerely,

Md Shahanur Islam Shagor
