I am writing to apply for the Fachingenieur fˆ…r temporˆ/re Verkehrsplanung position at HERY GmbH. Your focus on structured systems, clear planning, and professional standards aligns with how I approach technical work.

My background is in software engineering, where I have spent over four years building full-stack applications and systems that require precise planning, documentation, and quality assurance. I am accustomed to working within defined standards and taking ownership of deliverables from start to finish.

In my professional experience at Explo-IT, I developed scalable web applications using Laravel and Next.js, built RESTful APIs, and implemented authentication and payment systems. I worked closely with stakeholders to understand requirements, coordinated with team members, and ensured that every feature met internal quality standards before deployment.

One area that particularly interests me is the emphasis on documentation and quality assurance at HERY. In my previous roles, I maintained detailed technical documentation, followed structured development workflows, and used CI/CD pipelines to ensure consistent and reliable releases. I value clear processes and transparent decision-making.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to bring my structured approach and technical discipline to HERY GmbH. I have attached my CV for your review.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
