I am writing to apply for the Werkstudent:in Grafikdesign position at Vermas Distribution. Your focus on developing merchandise, corporate wear, and fashion products with character and quality aligns with my own approach to design: thoughtful, detail-oriented, and driven by real-world usability.

Through my design and development work, I have built a strong sense of visual composition, typography, and color theory. I am proficient with Figma and have experience creating mock-ups, presentations, and production-ready assets. I understand the importance of preparing druckfertige Dateien and coordinating material specifications, print techniques, and placements.

One area that particularly interests me is the integration of AI tools into design workflows. I have hands-on experience using AI for image processing and creative tasks, which can help streamline repetitive work and explore new design possibilities. I am comfortable working independently on structured tasks while also contributing ideas during the creative development of collections.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to bring my design skills, structured working style, and interest in fashion and streetwear to your team. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
