I am writing to apply for the Studentische Aushilfe (m/w/d) im Produktmanagement position at The Pampered Chef Deutschland GmbH. Your focus on developing and marketing premium kitchen products, combined with a flat organizational structure that values ownership and continuous learning, is exactly the kind of environment where I can contribute effectively while growing professionally.

Through my hands-on project development, I have built full-stack web applications where I was responsible for conceiving and creating landing pages, writing product-related content, and ensuring a smooth user experience. For example, I designed and developed a travel agency platform where I created the UI using Next.js and Tailwind CSS, and I wrote and structured content for multiple tour packages and service pages. This experience directly aligns with your need for someone who can formulate product texts and create landing pages.

In addition to content and landing page work, I regularly performed market and competitive analysis as part of my development process. I analyzed competitor websites, pricing structures, and design trends to ensure the platforms I built were well-positioned. I also supported reporting and data evaluation by tracking user engagement metrics and presenting findings to stakeholders. These skills map naturally to your requirements for product and market analysis, reporting, and evaluation.

One area that particularly interests me is the opportunity to work on video scripts, voice-over texts, captions, and user manuals. In my previous projects, I have written technical documentation, prepared presentation materials, and communicated complex features in clear, user-friendly language. I am comfortable working across both technical and non-technical content, and I enjoy the process of making information accessible and engaging.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am a current Software Engineering student, which gives me a structured and analytical approach to problem-solving. I have attached my CV for your review and would welcome the chance to discuss how I can support your product management team.

Sincerely,

Md Shahanur Islam Shagor
