I am writing to apply for the (Senior) Consultant Regulatory Analyst position at Severn Consultancy GmbH. The work of Regupedia in providing a comprehensive overview of regulatory changes for financial institutions is impressive, and I am drawn to the opportunity to contribute to a team that values knowledge sharing and continuous development.

My background is in software engineering, where I have spent over four years building full-stack applications and solving complex technical problems. This experience has given me a structured, analytical mindset that I believe is directly transferable to regulatory analysis. I am accustomed to researching specifications, understanding intricate requirements, and documenting my findings in a clear, actionable manner.

One area that particularly interests me is the creation of detailed analyses and factsheets. In my previous work as a Web Developer, I was responsible for documenting system architectures, writing technical guides, and creating reports for both technical and non-technical stakeholders. I am confident I can apply this same discipline to researching financial norms and standards and producing high-quality regulatory content.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my research abilities and structured approach to the Regupedia team. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to Severn Consultancy.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
