I am writing to apply for the SAP Inhouse Prozessberater MM/PP position at Lˆ¶dige Industries GmbH. Your company's global leadership in logistics systems and airport solutions is impressive, and I am interested in contributing to your SAP team in Paderborn.

My background is in full-stack software engineering, where I have developed strong analytical and process-oriented skills. I have experience working with enterprise-level systems, gathering requirements from stakeholders, designing solutions, and coordinating implementations across teams. This has given me a structured approach to problem-solving that aligns well with process consulting work.

In my professional experience as a Web Developer, I have worked on requirement analysis, solution design, testing support, and documentation. I have supported live production systems, handled incidents, and coordinated deployments. These responsibilities directly mirror the SAP consultant role of supporting systems in live operation, managing changes, and participating in rollout projects.

I am comfortable working independently and taking ownership of tasks. I communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the possibility of discussing how my technical background and process-oriented approach can contribute to Lˆ¶dige Industries.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
