I am writing to apply for the Ausbildung als Kauffrau/Kaufmann im Bereich Marketingkommunikation at BARFER'S. Your mission to provide biologically appropriate raw nutrition for dogs and cats through premium products and a growing network of stores and online channels is genuinely interesting. I appreciate how BARFER'S combines product quality with a strong sense of purpose in pet health.

As a software engineering student with hands-on experience in web development and data-driven projects, I bring strong analytical and organizational skills to this role. I enjoy working with numbers, analyzing data, and identifying patterns. In my previous work, I regularly handled data processing, performance analysis, and reporting tasks that required structured thinking and attention to detail.

One area that particularly interests me is the combination of market analysis, campaign evaluation, and budget tracking described in this position. Through my development work, I have built systems that track user behavior, measure engagement, and generate reports. These experiences have given me a practical understanding of how data supports decision-making in marketing and business contexts.

I am a structured and organized person who communicates clearly with both technical and non-technical team members. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international environments. I am eager to learn marketing communication from the ground up and bring my analytical mindset to BARFER'S team.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
