I am writing to express my interest in joining the Karriereweg Netzwerk as a selbstˆndiger Personalberater. Your approach to building a modern network that combines personal consulting expertise with KI-Technologie, CRM, and automated processes stands out. The idea of moving beyond traditional franchise models toward a technology-enabled, partnership-based structure is exactly the kind of forward-thinking environment I want to be part of.

What draws me to this opportunity is the emphasis on combining human judgment with modern digital infrastructure. As a software engineer who has built AI-powered platforms and full-stack applications, I understand how technology can enhance recruitment workflows, candidate management, and client relationships. I am not a traditional recruiter, but I bring a rare combination of technical depth and entrepreneurial thinking that fits well with your vision.

In my professional experience as a Web Developer, I have designed and delivered scalable systems that integrate authentication, role-based access control, payment gateways, and real-time features. I have worked with Laravel, Next.js, and Node.js to build platforms that handle complex user workflows and data management. This technical background gives me a practical understanding of how CRM systems, candidate engines, and KI-gestˆ…tzte Prozesse work under the hood.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in technology and my interest in modern recruitment models could contribute to the Karriereweg network.

Sincerely,

Md Shahanur Islam Shagor
