I am writing to apply for the Ingenieur*in Netzanschluss Wind, PV, BESS position at renerco plan consult GmbH. Your work in renewable energy planning and network connection across Germany and Europe is impactful, and I am interested in contributing to your mission of shaping the energy transition.

My background is in software engineering and systems integration, with a focus on building reliable, scalable applications. I have experience working with backend frameworks like Laravel and Node.js, frontend technologies such as Next.js and React, and databases including MySQL and PostgreSQL. I also work with Linux servers, Docker, and Nginx for deployment and system maintenance. These skills support the analytical and structured approach needed for developing network connection concepts and technical specifications.

Through my professional experience as a Web Developer, I have designed and implemented RESTful APIs, role-based access control systems, and real-time data features. I have coordinated with cross-functional teams and external stakeholders to deliver projects on time. This experience in managing technical requirements and communicating clearly with different audiences aligns with the coordination and advisory responsibilities described in this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical background and problem-solving approach can contribute to renerco plan consult’s projects.

Sincerely,

Md Shahanur Islam Shagor
