I am writing to express my interest in the Head of Marketing / Marketingleitung Pharma position at Andris Consulting GmbH. While my professional background is in software engineering and AI, I bring a strong foundation in strategic thinking, cross-functional collaboration, and end-to-end project delivery that aligns with the leadership and coordination demands of this role.

Through my work as a Web Developer, I have led the development of full-stack applications from concept to deployment, working closely with stakeholders to define priorities, manage timelines, and deliver results. I am accustomed to taking ownership of complex systems, ensuring clarity in communication, and maintaining accountability across teams.

One area that particularly interests me is the opportunity to work within an international matrix and contribute to the launch of new products, including a digital health application. My experience integrating third-party services, building scalable architectures, and coordinating across technical and business teams has prepared me to navigate the cross-functional collaboration this role requires.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in delivering complex projects and working across teams could contribute to the continued growth of your organization.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
