I am writing to apply for the Projektmanager Prozessoptimierung position with MY Humancapital GmbH's partner company in Munich. The role's focus on analyzing and optimizing workflows, developing process standards, and coordinating cross-functional teams aligns with my engineering background and my interest in building efficient, well-documented systems.

Through my work as a software engineer, I have developed a structured approach to problem-solving that is directly applicable to process optimization. I am accustomed to analyzing existing systems, identifying bottlenecks, and implementing improvements. My experience includes creating clear documentation, generating reports, and ensuring that project standards are followed throughout the development lifecycle.

A key part of my previous roles involved coordinating between different teams and stakeholders. I have worked closely with developers, designers, and business teams to align project goals and ensure smooth execution. This has given me practical experience in managing communication, tracking progress, and maintaining consistency across multiple workstreams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, structured working style, and experience in coordinating projects would allow me to contribute effectively to your team. I have attached my CV for your review and would welcome the opportunity to discuss how my background fits this role.

Sincerely,

Md Shahanur Islam Shagor
