I am writing to apply for the Servicetechniker Heizung/Sanitˆr position at Riverstate Premium Recruiting. While my professional background is in software engineering, I have a strong foundation in technical systems, problem-solving, and working independently with clients. I am a quick learner and hard worker, and I am confident I can bring the same level of dedication and technical precision to this role.

My experience as a Web Developer has involved diagnosing complex issues, maintaining systems, and ensuring reliable performance. I am accustomed to working with structured processes, documenting my work, and communicating clearly with both technical and non-technical stakeholders. These skills translate directly to the service technician role, where systematic troubleshooting and clear documentation are essential.

I am particularly drawn to the opportunity to work with modern tools and processes, including digital reporting and structured planning. I am eager to learn the specifics of heating and sanitary systems and am committed to obtaining any necessary certifications, such as the Kˆlteschein, which your company supports.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of discussing how my skills and work ethic can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
