I am writing to apply for the Kreditanalyst (w/m/d) Factoring position at V-HEAL GmbH. While my professional background is in software engineering, I bring strong analytical capabilities, structured thinking, and a proven ability to solve complex problems independently.

In my previous work as a Web Developer, I regularly analyzed system requirements, identified risks, and optimized processes to improve performance and reliability. I am accustomed to working with data, making informed decisions, and taking full ownership of my responsibilities.

I am a quick learner who adapts quickly to new domains. I am confident I can apply my analytical mindset and structured approach to credit analysis, risk assessment, and process optimization in the factoring business.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
