I am writing to apply for the Servicetechniker Heizung/Sanitˆr position at Riverstate Premium Recruiting. While my professional background is in software engineering rather than traditional SHK trades, I bring strong technical problem-solving abilities, experience with digital tools and reporting systems, and a structured approach to maintenance and service operations that I believe can be valuable in this role.

Through my work as a Web Developer, I have developed a methodical approach to diagnosing issues, documenting workflows, and maintaining systems under real operational conditions. I am experienced with digital documentation, reporting tools, and structured communication with both technical teams and end users. These skills translate directly to the service technician role, where accurate documentation and clear communication with the Einsatzleitung are essential.

One area that particularly interests me is the emphasis on modern, digital-first processes in this position. I have hands-on experience with Linux servers, Docker, Nginx, and CI/CD pipelines, which has given me a strong comfort level with technology and digital tools. I am confident I can quickly adapt to using Surface Tablets, digital Kundendienstberichte, and structured Einsatzplanung systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and problem-solving approach can contribute to your team in Munich.

Sincerely,

Md Shahanur Islam Shagor
