I am writing to apply for the Projektmanager im Online Marketing position at SUCHMEISTEREI GmbH. The combination of strategic client leadership, cross-channel decision-making, and active use of AI in daily workflows aligns well with how I approach complex projects.

What stands out to me about this role is the emphasis on leading client relationships rather than just managing tasks. In my previous work, I have been responsible for defining project goals, coordinating with stakeholders across departments, and ensuring that deliverables meet both client expectations and business objectives. I am comfortable taking ownership of roadmaps, facilitating kick-offs and reviews, and making channel mix decisions that drive measurable growth.

I use AI tools regularly in my workflow for research, content drafting, data analysis, and process automation. I understand where AI adds real efficiency and where human judgment remains essential. This practical experience allows me to integrate AI meaningfully into project execution without treating it as a gimmick.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in project management, client relations, and AI-driven workflows can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
