I am writing to express my interest in joining the team at Tommy's Brewing Company for the Brentwood Chaguanas location. While my professional background is in software engineering rather than hospitality, I bring a strong work ethic, hands-on problem-solving ability, and experience building and maintaining systems that support growing operations.

Through my professional experience as a Web Developer, I have developed full-stack web applications using Laravel, Next.js, and React. I have built RESTful APIs, implemented authentication and role-based access control, and optimized database performance. I have also deployed and maintained applications on Linux servers using Docker, Nginx, and CI/CD pipelines. These skills have taught me to work methodically, troubleshoot effectively, and deliver reliable results under real-world constraints.

One area that particularly interests me about Tommy's Brentwood is that it represents a significant step forward for the company. I appreciate the focus on quality, from Duotank technology to fresh pizza and craft beer. I am looking for an opportunity where I can contribute to something growing and hands-on, and I am ready to learn the operational side of the business while bringing my technical discipline and reliability to the team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I would welcome the opportunity to discuss how I can contribute to the Tommy's experience in Central.

Sincerely,

Md Shahanur Islam Shagor
