I am writing to apply for the Test Role at Atlantic Strategic Minerals. With a background in full-stack development and a focus on building reliable, scalable systems, I am well positioned to contribute to your team.

My technical experience spans both frontend and backend development. I have worked extensively with Laravel and Next.js to build production applications, handling everything from API design and authentication to responsive UI implementation. I am comfortable working with MySQL, PostgreSQL, and Redis for data management, and I use Docker and Nginx for deployment and server management.

In previous work, I built RESTful APIs, integrated payment gateways, and implemented role-based access control in Laravel-based systems. I also developed real-time features using WebSockets and optimized database queries for better performance. On the frontend side, I created SEO-friendly interfaces with Next.js and Tailwind CSS, ensuring a smooth user experience across devices.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills align with the needs of Atlantic Strategic Minerals.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
