I am writing to apply for the Personalsachbearbeiter (M/W/D) Entgeltabrechnung / Payroll position at Alfred Paulsen GmbH & Co. KG. Your company's long-standing reputation as a family-owned business producing high-quality food products for over 100 years is impressive, and I would welcome the opportunity to contribute to your team in Otterndorf.

Although my professional background is in software engineering, I have developed strong skills in data management, structured workflows, and precision that are directly applicable to payroll and personnel administration. Through my experience working with databases like MySQL and PostgreSQL, I am accustomed to handling large volumes of sensitive data accurately and maintaining strict data integrity.

In my professional experience as a Web Developer, I managed complex data systems, built authentication and role-based access control, and ensured that every transaction was processed correctly and securely. These responsibilities required the same level of accuracy, discretion, and reliability that payroll processing demands. I am confident in my ability to learn payroll-specific software and apply my structured approach to managing employee records and monthly compensation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in data management, organization, and reliability can support your payroll team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
