I am writing to apply for the Leiter Mitgliederbetreuung / Head of Member Relations position at Iffarth Consulting. The role's focus on digitalizing membership processes and building scalable CRM solutions aligns with my experience in full-stack development and process automation.

Through my professional experience as a Web Developer, I have designed and developed scalable web applications using Laravel and Next.js. I built RESTful APIs, implemented authentication and role-based access control, and optimized database performance through Eloquent query tuning and caching strategies. I also deployed and maintained applications on Linux servers with Nginx, Apache, and Docker, using CI/CD pipelines for reliable delivery.

One area that particularly interests me is the optimization and digitalization of membership processes and CRM systems. In my work on a Multivendor E-commerce Management Ecosystem, I built a full-stack platform with role-based access for customers, sellers, and delivery agents. I integrated Firebase notifications, Google Maps API, and Redis for caching, and managed the entire backend with Laravel and MySQL. This experience in building scalable, multi-role systems with clear process flows is directly relevant to developing and maintaining CRM solutions for member management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in building scalable digital systems can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
