I am writing to express my interest in the Senior Operations Manager - DTC & Supply Chain position at Purefemm. While my professional background is in software engineering, I bring a strong analytical mindset, experience building scalable systems, and a practical understanding of how technology can streamline operations and improve efficiency.

Through my work as a full-stack developer, I have designed and built complex platforms that required careful coordination across multiple stakeholders, real-time data processing, and robust automation. I have experience with AI tools and workflow automation, which I see as directly applicable to optimizing operational processes, inventory forecasting, and customer support workflows.

One area that particularly interests me is the ownership mentality Purefemm emphasizes. In my previous roles, I have taken full responsibility for projects from planning through deployment, proactively identifying bottlenecks and implementing solutions independently. I am comfortable working directly with founders and making operational decisions without micromanagement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and systems-building skills can contribute to Purefemm’s growth and operational excellence.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
