I am writing to express my interest in the Senior FP&A Analyst position at MILES Mobility. Your focus on building a strategic financial co-pilot for a rapidly growing business unit, with an emphasis on budgeting, forecasting, and unit economics, aligns with my technical background in data-driven systems and financial application development.

MILES Mobility's mission to provide flexible, sustainable mobility solutions in Berlin and beyond is compelling. The opportunity to work in a dynamic, hands-on environment where data directly influences pricing and strategic scaling is exactly the kind of challenge I seek.

Through my professional experience as a Web Developer, I have built and maintained data-intensive applications using SQL, MySQL, and PostgreSQL. I have designed database schemas, written complex queries, and optimized performance for real-time reporting. My work with Laravel and Node.js has given me a strong foundation in building driver-based models and handling multi-entity data structures.

One area that particularly interests me is the unit-economics framework and cost allocation model. In my project work on an AI-powered financial application, I developed APIs using Express, TypeScript, and MongoDB, and integrated systems for automated data processing and PDF generation. This experience has prepared me to independently query invoice tables, aging views, and transaction logs, and to translate raw data into clear, actionable insights for management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my technical and analytical skills can contribute to MILES Mobility's financial roadmap.

Sincerely,

Md Shahanur Islam Shagor
