I am writing to apply for the Customer Service Manager position at brandnooz Media GmbH. Your D2C platform for FMCG innovations, delivering monthly boxes to thousands of consumers and serving over 600 brands, is an impressive model. I am interested in contributing to your customer service team and helping to maintain the high-quality experience your Noozies expect.

My background is in software engineering, where I have spent over four years building and maintaining web applications. I have developed full-stack platforms using Laravel, Next.js, React, and Node.js, and I am comfortable working with databases like MySQL and PostgreSQL. I have also integrated payment gateways such as Stripe and PayPal, which is directly relevant to handling customer inquiries about orders, subscriptions, and payment issues.

One area that particularly interests me is your AI hotline and website chatbot. I have hands-on experience building AI-powered features, including developing a financial app that used OpenAI's API for an intelligent assistant and a real estate platform that integrated AI for image processing and user interaction. I am confident I can support the maintenance and further development of these tools to improve your service quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
