I am writing to apply for the Spezialist Portfoliomanagement position at Foxio Consulting GmbH, supporting the Deutsche Apotheker- und ˆ rztebank (apoBank). While my professional background is in software engineering rather than banking, I bring strong analytical skills, experience building secure systems, and the ability to work with complex data and client-facing solutions.

Through my work as a full-stack developer, I have built systems that require careful attention to user needs, data integrity, and security. I have developed applications with role-based access control, authentication workflows, and real-time data processing. These skills translate well into portfolio management environments where accuracy, confidentiality, and structured decision-making are essential.

In my professional experience as a Web Developer at Explo-IT, I designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented secure payment gateways. I also optimized database performance through query tuning and caching strategies, and deployed applications on Linux servers with CI/CD pipelines. This experience has given me a strong foundation in building reliable, user-focused systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experience can contribute to the team at Foxio Consulting GmbH.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
