I am writing to apply for the Technical Sales Support position at BEIJER REF Deutschland GmbH. Your company's role as a subsidiary of a European market leader in refrigeration and climate technology, combined with your focus on customer proximity and team collaboration, makes this an opportunity I find genuinely interesting.

Through my professional experience as a Web Developer, I have developed strong technical problem-solving skills and the ability to communicate complex information clearly. I have worked on designing scalable web applications, building and integrating RESTful APIs, and managing databases using MySQL and PostgreSQL. These experiences have given me a solid foundation in understanding technical systems and supporting end-users effectively.

One area that particularly interests me is the technical support and coordination aspect of this role. In previous positions, I collaborated closely with stakeholders and engineering teammates to deliver features, resolve issues, and ensure smooth project workflows. I am comfortable handling technical inquiries, supporting customers, and working across functions to maintain organized operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my hands-on approach, reliability, and willingness to learn new skills would allow me to contribute positively to your team in Munich. I have attached my CV for your review and look forward to the possibility of discussing how I can support BEIJER REF Deutschland GmbH.

Sincerely,

Md Shahanur Islam Shagor
