I am writing to apply for the Technischer Objektverwalter (m/w/d) position at MY Humancapital GmbH. While my professional background is in software engineering and system architecture, I bring a strong technical foundation, structured problem-solving skills, and experience managing complex systems that align with the responsibilities of this role.

Through my work as a Web Developer, I have been responsible for the technical operation and maintenance of web applications, including server health monitoring, deployment pipelines, and ensuring compliance with security standards. I have managed Linux-based servers using Nginx and Docker, coordinated with teams to plan maintenance windows, and maintained detailed documentation for system configurations and incident reports. This experience has given me a practical understanding of technical asset management, quality assurance, and process documentation.

One area that particularly interests me is the coordination of technical teams and resources. In previous roles, I have worked closely with cross-functional teams to plan tasks, allocate resources efficiently, and ensure that all technical work meets quality and regulatory standards. I am comfortable acting as a central point of contact between technical staff, external vendors, and stakeholders, and I have experience preparing reports and communicating technical status clearly to non-technical audiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and organizational skills can contribute to your team. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
